

## DISCOVERY CORON 2023 CSR ACTIVITIES

**Adopt a Biik Program** - The Adopt a Biik Program has been an ongoing initiative since 2022, where Discovery Coron purchases piglets and awards them to families who wish to adopt them. When the pigs are ready for sale, Discovery Coron buys them back. Fifty percent of the sale proceeds are given to the local families who cared for the pigs, providing them with a means of livelihood.

**The Bili Ani Program** is an initiative by Discovery Coron that encourages local farmers to plant vegetables and other crops needed for the Firefish Restaurant and Cafeteria. This program aims to provide local farmers with a means of livelihood.

The Discovery Pupils Award started in 2014 and provides rewards to the elementary valedictorians and salutatorians of Brgy. Decalachao, San Jose, Maricaban, Dicabobo, and Bucatan Elementary Schools. This initiative is a simple way of rewarding students for their hard work at school through cash assistance and certificates.

**Box of Love** - Discovery Coron strives to make a meaningful impact and show our commitment to the community's development and well-being by donating television, facemasks and diesel.

**Brigada Eskwela** - Discovery Coron is proud to join Brigada Eskwela, volunteering to assist in repainting the school and participating in other maintenance activities such as lawn mowing. Through this initiative, we aim to contribute to the improvement of school facilities, ensuring a safe and conducive learning environment for students. Our participation reflects our commitment to community engagement and the spirit of volunteerism.

**Bayanihan** – Feb 24, 2024 (The Grand Build Learning Center) – Discovery Coron assisted in carpentry, masonry, food preparation and clearing for the Learning Center at Guadalupe, Coron.

**Cheers for Chairs** is a program where a percentage of the sales from guest purchases of food and beverages goes towards the Cheers for Chairs initiative. Discovery Coron will then donate these chairs to the chosen elementary school.

**Happy Sweepers** - The Happy Sweepers program was started in December 2023 to help local individuals, including those with no educational background, find employment. Their main task is to maintain the cleanliness of the beach shores.

Discovery Coron participated in a **mangrove planting activity** at Brgy. San Jose. This initiative reflects our commitment to environmental conservation and community engagement, contributing to the preservation and restoration of vital mangrove ecosystems.

Discovery Coron recently participated in a **medical mission** at Brgy. Decalchao alongside our resort physician, Dr. Josh Wong. This initiative is part of our commitment to improving community health and well-being.
